

Furnio

MANUFACTURING

Precision furniture manufacturing for architects, designers and brands.

The workshop behind the designer.

Furnio is a furniture manufacturing unit in Gurugram, Delhi NCR. We make built-in and loose furniture to the drawings of architects, interior designers and businesses. We don't design homes and we don't sell to end clients, so we never compete with the people who bring us work. Every production stage, from the first cut to the final coat, happens under one roof.

— WHO WE WORK WITH

Architects

Your detail, built as drawn. We read your GFCs, return shop drawings for sign-off and hold your tolerances across every unit.

Interior designers

A production floor you can rely on without running one. Your client sees your name. We stay in the background.

Brands and business owners

Repeatable fixtures for stores, offices, restaurants and hotels. The fortieth unit matches the first, and roll-outs run to a schedule.

— OUR COMMITMENTS

Your name stays on the project

No Furnio branding on site and no contact with your client unless you ask us to. The project is yours.

Drawings are signed off before we cut

Shop drawings and samples go to you first. What arrives on site is what you approved.

Specifications in writing

Board, finish and hardware are named in the quote and on the drawing, never "equivalent" after the fact.

One point of contact

One person who knows the job from first drawing to final fix, and answers the phone.

Six stages. One roof.

01 Panel and beam saw

Full boards broken down into square, accurately sized panels with chip-free straight cuts. Every unit starts here.

02 CNC nesting router

Shaped parts, internal cut-outs and every hinge, dowel and hardware hole cut from one program, so parts line up first time.

03 Routing and profiling

Grooves, profiled shutters, shaker frames and recessed details, kept consistent across a full set of fronts.

04 Automatic edge banding

Exposed edges sealed and trimmed flush by machine, for a clean line that resists moisture, impact and peeling.

05 Hydraulic cold press

Laminates and veneers bonded to ply, MDF or particle board under even, full-surface pressure. Flat, firm, no bubbles.

06 Enclosed paint booth

A dust-controlled spray booth with drying and its own paint team, for matte, satin and gloss PU and painted finishes.

WHAT WE MAKE

Modular kitchens

Carcasses, shutters, tall units and islands in BWP plywood or HDHMR, with hardware named by brand and model.

Wardrobes and storage

Hinged, sliding and walk-in wardrobes, study units, TV walls and vanities, factory-finished and site-ready.

Retail fixtures

Display walls, showcases, cash counters and back-of-house storage for showrooms and mall stores.

Hospitality joinery

Bar counters, banquettes, back-bars, reception desks and room joinery for restaurants and hotels.

Workspace furniture

Workstations, cabin furniture, pantry units and storage walls for offices and studios.

Panelling and custom pieces

Fluted and veneered wall panelling, doors, consoles and one-off pieces made to your drawing.

MATERIALS AND FINISHES

Boards

BWP / BWR plywood, HDHMR, MDF, Pre-laminated particle board

Surfaces

Laminates, Natural veneers, Acrylic, Membrane, PU and duco paint, Lacquered glass

Edges

PVC and ABS edge bands, Matched to shutter colour, Veneer edging

Hardware

Specified by brand, model and quantity, Soft-close hinges and drawer systems, Lift-ups, baskets and profiles

HOW AN ORDER RUNS

1. Send the drawings

GFCs, elevations, a BOQ or even a marked-up sketch. Tell us the site, the quantity and the date you need it.

2. Itemised quote

Priced line by line, with board, finish and hardware written out by name, so you can compare it fairly and pass it on.

3. Shop drawings and samples

We return production drawings and finish samples. Nothing is cut until you sign them off.

4. Production

Cut, edged, pressed and finished under one roof, with progress updates and photos as it moves through the floor.

5. Quality check and dispatch

Every unit is checked against the drawing, labelled by room and position, and packed for the site.

6. Installation

Our own fitters install, or we hand over to your contractor with a clear installation pack.

Send us the drawings.

Itemised quote within one working day. Factory visits by appointment.
